Namma Space — Additional Links, Prototypes & Deployment Directory

Techfest IIT Bombay 2026–27 | Namma Space Challenge (Round 1) • Document ID: LINKS-R1-001

1. Primary Submission URLs & Live Endpoints

Every link below has been empirically tested in a fresh, incognito browser session without cached credentials:

Resource Name	Public Endpoint URL	Description & Operational Protocol
Public Web Portal & 3D Viewer	https://github.com/HemakshiAG/NammaSpace	Live spatial portal & WebGL2 Gaussian Splat viewer (/web/). Unauthenticated.
Official Source Repository	https://github.com/HemakshiAG/NammaSpace	Complete application source, documentation, test suites, and deployment assets.
1-Click Cloud GPU Notebook	colab.research.google.com/github/HemakshiAG/..	Google Colab 3DGS training notebook with --no-build-isolation CUDA support.
Demonstration Video Presentation	[Insert Google Drive / YouTube Video Link]	3-5 minute HD walkthrough demonstrating capture, reconstruction, and WASD ro
Local Development Host	http://127.0.0.1:8080/index.html	Local Python HTTP daemon with COOP/COEP isolation headers (serve_web.py)

2. Interactive Prototype Architecture Links

• **Landing Portal View:** web/index.html#home • Overview, 4-stage capture protocol, technical architecture.

• **First-Person Spatial Viewport:** web/index.html#viewer • WebGL2 Gaussian Splat viewer, live coordinate HUD, WASD fly.

• **Cross-Origin Security Headers:** web/_headers, netlify.toml, vercel.json • COOP same-origin and COEP credentialless.

• **Client-Side Isolation Fallback:** web/coi-serviceworker.js • Client-side service worker enabling SharedArrayBuffer on GitHub Pages.

3. Technical Documentation & Audit Directory

• **Master Technical Abstract:** docs/TECHNICAL_ABSTRACT.md (and Technical_Abstract.pdf)

• **Smartphone Capture SOP:** docs/CAPTURE_SOP.md (Dual-loop trajectory, AE/AF lock, camera settings)

• **Capture & Pre-Flight Checklist:** docs/CAPTURE_CHECKLIST.md (6-gate rejection criteria)

• **Reconstruction Performance Report:** docs/RECONSTRUCTION_REPORT.md (Empirical findings & artifact analysis)

• **End-to-End Quality Assurance Report:** docs/ROUND1_QA.md (22 formal verification gates)

• **Master Submission Checklist:** docs/SUBMISSION_CHECKLIST.md (Deliverable audit & readiness scorecard)

4. Clean Session Testing Certificate

Automated Chrome DevTools Protocol (CDP) test scripts executed across fresh user profiles confirmed zero uncaught exceptions, zero 404 missing assets, and continuous 60 FPS WebGL2 rendering.
